

The New E-Belt:

Product Information

The New E-Belt consists of a moulded poly-carbonate tube and cap wrapped in rugged leather, fixed onto the same width (1½") heavy grade polypropylene webbing, double nylon stitched, just like before and is able to withstand 800 lbs of crush. The EpiPen® is doubly protected when it is in its case and inside the E-Belt, offering even more protection to the EpiPen® than before! The same E-Belt design means that the functionality, ruggedness, discreteness and longevity are unmatched and unsurpassed by any other product on the market. Available in a single or double EpiPen® carrying capacity, with a belt attached or as a hanging Holster.

The distributors of the newly designed EpiPen®, strongly recommend that the new oval shaped auto-injector be carried inside the original plastic case in which it is dispensed. The New E-Belt now houses the new oval style EpiPen® while it remains inside its plastic carrying case.

Add-On Pouches: Inhaler Puffer and/or Anti-Histamine/Benadryl Pouches are also available on select sizes as indicated below.

E-BELT Sizes:

- Small - 19" to 24" (Add-On Pouches NOT available)
- Medium - 24" to 29" (can add either Inhaler/Puffer Pouch or Anti-Histamine Tablet Pouch)
- Large - 29" to 34" (can add either Inhaler/Puffer Pouch or Anti-Histamine Tablet Pouch or both)
- XLarge - 34" to 39" (can add either Inhaler/Puffer Pouch or Anti-Histamine Tablet Pouch or both)
- XXLarge - 39" to 44" (can add either Inhaler/Puffer Pouch or Anti-Histamine Tablet Pouch or both)
- Holster - (Add-On Pouches NOT available) Requires existing pant belt, strap or key ring.

Please Note:

There is only one way that the new oval EpiPen® fits into the new E-Belt. Be sure to insert the yellow coloured EpiPen® lid with the hinges closest to the polypropylene webbing belt and thumb tab outwards.
